EDUCATION

University of Trento | Sep 2024 - Present

BSc, Computer, Communications and Electronic Engineering - Trento, Italy

- Third-year student; core coursework completed. Remaining degree requirements in progress, with enrollment planned throughout 2027.
- Merit scholarship: EUR 7,200 per academic year and full tuition waiver. Selected results: Java and Object-Oriented Programming 30L/30; Signal Processing 30/30.
- Relevant coursework: Data Structures and Algorithms, Object-Oriented Programming, Software Engineering, Databases, Operating Systems and Computer Networks.

Politecnico di Milano | Sep 2025 - Feb 2026

Academic exchange - Artificial Intelligence, Databases and Remote Sensing Systems.

SELECTED ENGINEERING PROJECTS

Ordanis - Distributed Workflow Platform | 2026

Java 21, Spring Boot, gRPC, PostgreSQL, React, TypeScript, Docker

- Built a distributed workflow engine with DAG-based dependency resolution and parallel task execution.
- Implemented task leases, heartbeats and requeuing to recover work after worker disconnects; built a React/TypeScript operations dashboard.

Synapse HEA - Healthcare Management Platform | 2026

Java 21, Spring Boot, React, TypeScript, MySQL, Redis, Docker

- Developed a healthcare application with patient and billing workflows, a Spring Boot backend and a React interface.
- Implemented REST APIs with Spring Security and JWT, relational data models and JUnit tests; containerized the application with Docker.

Krotoski Lodz Digital Twin | 2026

React, TypeScript, Process Modelling

- Developed a digital-twin prototype dashboard for automotive showroom operations in an international engineering project.
- Translated stakeholder requirements into an interactive frontend and presented the solution to stakeholders.

Bare-Metal ARM Microcontroller Drivers | Ongoing

C, STM32, ARM Cortex-M, Logic Analyzers, Git

- Developing STM32 peripheral drivers through memory-mapped register configuration; integrating SPI and I2C communication without high-level vendor libraries.

TECHNICAL SKILLS

Languages: C++, Python, Java, TypeScript, JavaScript, SQL

Backend & tools: Spring Boot, Node.js, REST APIs, gRPC, Docker, Linux, Git, CI/CD

Data & frontend: PostgreSQL, MySQL, MongoDB, Redis, React, HTML, CSS

Foundations: Data Structures and Algorithms, Operating Systems, System Design

Embedded development (ongoing): Bare-Metal C, ARM Cortex-M, GPIO, SPI, I2C

Languages spoken: English (C1); German (A1)

LEADERSHIP & INTERNATIONAL EXPERIENCE

San Bartolomeo Residence Council - Elected Board Representative | Jan 2026 - Present

- Represent residents in housing-management meetings, consolidate feedback and coordinate facility improvements.

ECIU University Challenges - International Project Participant | 2025 - 2026

- Collaborated on engineering and rapid-prototyping challenges with Linköping University and Lodz University of Technology in Sweden and Poland.
