Profile

Bachelor's student in Computer, Communications and Electronic Engineering focused on software engineering and backend development. Hands-on experience building Java/Spring Boot and full-stack applications, designing REST APIs and relational data models, and solving programming problems with C++ and Python. Experienced in international projects across Italy, Sweden, and Poland. Currently preparing for a 12-month engineering internship at intelliCard Solutions AG (Sept 2026–Aug 2027), with active learning focused on AI/ML fundamentals and data-driven systems.

Education

University of Trento **Sep 2024 – Present**
BSc in Computer, Communications and Electronic Engineering *Trento, Italy*

- Recipient of a merit-based scholarship worth EUR 7,200 per academic year, with tuition waiver.
- Achieved perfect exam scores (30/30) in Signal Processing and Business Organization and Management.
- Selected coursework: Java and object-oriented programming, software engineering, databases, operating systems, and computer networks.

Politecnico di Milano **Sep 2025 – Feb 2026**
Erasmus+ Exchange Student *Milan, Italy*

- Completed an international academic exchange with coursework including artificial intelligence, databases and remote sensing systems.

Technical Skills

Certifications (In Progress): CompTIA Security+, CompTIA Network+
Languages: Java, C++, Python, JavaScript, TypeScript, SQL
Backend: Spring Boot, REST APIs, Spring Security, JWT, JPA/Hibernate, Node.js, Express
Frontend: React, HTML, CSS
Databases and Tools: MySQL, MongoDB, Redis, Git, GitHub, Docker, Maven, Postman, Linux
Foundations: OOP, Data Structures & Algorithms, Database Design, UML, Testing, Operating Systems, Computer Networks

Projects

Synapse HEA Healthcare Management Platform | *Java 21, Spring Boot, React, TypeScript, MySQL, Redis, Docker* **2026**

- Developed a full-stack healthcare platform covering authentication, patient and doctor workflows, appointments, prescriptions, billing, documents, notifications and administrative operations.
- Implemented REST APIs, role-based authorization, JWT authentication, relational data modelling, validation, API documentation, tests and containerized local deployment.

Krotoski Lodz Digital Twin | *React, TypeScript, Process Modelling, International Team Project* **2026**

- Co-developed a digital-twin prototype for automotive showroom and operational workflows during an ECIU challenge with Grupa Krotoski.
- Translated stakeholder needs and real business processes into a structured interactive solution while collaborating in a multidisciplinary international team.

Software Engineering University Project | *JavaScript, Node.js, Express, React, MySQL, UML* **2026**

- Contributed to a team-built healthcare web application covering requirements analysis, UML diagrams, authentication, database design and user-facing workflows.

International Experience and Leadership

ECIU University Challenges **2025 – 2026**
International Project Participant *Sweden and Poland*

- Worked with students from different academic and cultural backgrounds on project-based challenges connected to Linköping University and Lodz University of Technology.
- Practised rapid problem definition, stakeholder communication, teamwork and presentation of practical technical solutions.

San Bartolomeo Residence Council **Jan 2026 – Present**
Elected Student Representative *Trento, Italy*

- Represent residents in discussions with university housing management, communicate shared concerns and help coordinate responses to community and facility issues.
